ATSym Industry Night

Welcome Future Tunnellers

The ATSym invites all members, non-members, and students to join us for an engaging panel discussion featuring firsthand experiences from three tunnelling professionals at different stages of their careers. They will provide insights into working in Australia's tunnelling industry.

This is your chance to hear from and gain valuable guidance on career paths, industry trends, and challenges faced by tunnelling professionals from various sectors, including consultants and contractors. Don't miss this opportunity to gather wisdom from diverse perspectives and discover the exciting possibilities that await you in the world of tunnelling.

This event is organized by ATSym and Monash BEST and will be held both online and in person. Registrations are essential.

A special thank you to our event sponsors Arcadis and Aurecon!
